

CONFÉRENCE N°3 ANGLAIS

ANATOMIE DU COEUR

The heart is situated between the lungs and the mediastinum.

The heart is cone -shaped.

The heart contains two atria, two ventricles, two auricles, a bicuspid valve.

In an artery, the hollow center through which blood flows is called lumen.

The two arteries that receive blood ejected from by the ventricles each have a semi-lunar valve.

The serous pericardium is composed of a parietal and a visceral layer.

The triple-layered sac that surrounds (entourer) and protects the heart is called the pericardium.

The heart receives, pumps and propels the blood.

The heart pumps the blood into two closed circuits: the systemic circulation and the pulmonary circulation.

Exchange of nutriments and gases occurs across the thin capillary walls.

The right side of the heart is the pump for the pulmonary circulation, receives all deoxygenated blood and ejects the blood into the pulmonary trunk.

Normally, cardiac excitation begins in the sinoatrial node.

The phase of contraction is referred to as the systole and the first heart sound is the lubb.

The time following the dupp is when the ventricles are filling, known as diastole.

The amount of blood ejected from the left ventricle into the aorta each minute is called the cardiac output.

The nervous system control of the heart stems from (provenir) the cardiovascular center in the medulla.

CRITICAL APPRAISAL

Clinical study types :

- ▲ primary : case series, clinical trials, cohort studies
- ▲ secondary : meta analyses, systematic reviews

A type of scientific experiment, where the people being studied are arbitrarily given one or other of the different treatments under study, is said to be randomized.

A way of testing a medical therapy in which, in addition to a group of subjects that receives the treatment to be evaluated, a separate control group receives a fake treatment is named placebo-controlled.

GRAMMAIRE – LES TEMPS

- ↗ attirer l'attention sur une action en cours, ex : The patient is having a heart attack
- ↗ rajouter un commentaire, ex : I can't eat with you. I'm eating with George

LE PRÉTÉRIT BE + ING, was/were + ING

Cette forme est utilisée pour rendre compte des actions repérées dans le passé pour permettre d'y ajouter un commentaire, ex : What were you doing yesterday at 8 pm in the OR?

LE PRESENT PERFECT BE + ING, have/has + BEEN + ING

- ↗ ajouter un commentaire explicite ou implicite: insister sur une connaissance liée à une expérience, ex : I've been living in London all my life, I know all about it!
- ↗ Également avec FOR et SINCE, qui permettent d'insister sur l'expérience du sujet.

LE PAST PERFECT BE + ING, had + BEEN + ING

L'énonciateur reprend une relation passée en prenant un point de repère lui-même dans le passé pour y faire un commentaire.

ex : She had been drinking for years when she died of liver cancer.
